

## **CALOREX®**

### Capsules

### ***Burns Abdominal Fat***

#### **Composition**

Hydroxycitrate is derived from Garcinia cambogia fruit. Extensively tested natural product, and shown to be safe and effective in clinical studies. It is an important complement to weight loss and weight maintenance program. It is enhanced with the addition of Chromium.

#### **Action/Properties**

Hydroxycitric acid (HCA) is responsible for prevention from fat storage and acceleration of consumption of the energy resources in the organism. Carbohydrates consumed are transformed into glycogen - supplementary material cumulated in the liver and muscles, and not into triglycerides (fats). Furthermore, HCA decreases organism's demand for food, by increasing the feeling of satiety.

Chromium helps to increase lean body mass, lower blood cholesterol and regulate blood sugar. It facilitates HCA activity. Chromium is an essential nutrient to help dieters avoid the so-called "yo-yo effect" because it enhances the metabolism and promotes permanent fat loss. Chromium is also very beneficial for diabetics as it can normalize blood sugar and help alleviate hypoglycemia. Calorex incorporates two important substances to help selectively burning fat, reducing fat synthesis, it reduces appetite, regulates blood sugar, increases basal metabolic rate and helps loose weight.

#### **Usage**

Calorex has beneficial effects in

- Weight management
- Burning abdominal fat
- Regulating blood sugar (diabetes & metabolic syndrome)

#### **Dosage**

2 capsules daily 1 hour before meal.

**Calorex®** is a trade-mark of BOROLA. The product has been manufactured in the USA in compliance with the highest standards of GMP. Calorex is a food supplement.
